**DETAILED ACTION*****Election/Restrictions***

Applicant's election without traverse of Group II, claims 7-12 in the reply filed on 9/13/07 is acknowledged.

***Information Disclosure Statement***

The information disclosure statement filed 2/28/05 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

***Drawings***

Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 12, it is unclear as to how the electric field is applied when the polymerization method is not an electropolymerization.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Shim et al. (US 2004/0191951).

Shim et al. figs. 1-7 and related text in paragraphs [0025]-[0052] discloses the claimed method of manufacturing an organic MIS TFT device including the steps of forming a gate electrode 12 on a substrate 10 (fig. 2); forming a gate insulating film by a polymeric insulating film 14 formed by a polymerization method (fig. 3, paragraphs

[0036]-[0038]] forming source and drain electrodes 18 (fig. 4, paragraph [0050]);  
forming an organic semiconductor film 16 (fig. 4, paragraph [0049]).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shim et al. in view of Background of the invention.

Shim et al., figs. 1-7 and related text in paragraphs [0025]-[0052] discloses the claimed method of manufacturing an organic MIS TFT device as explained above, except the materials for forming the device; however, the material for forming the polymer insulating film is well-known as disclosed in the articles in the instant specification, page 6, first paragraph.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the well-known and commercial available materials for forming the polymer insulating film as in the instant claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bao et al., and Ong et al. are cited as of interest.
